Spatial Characterization of Multiphase Structures in 3D by Computed Tomography

C. L. Lin

Department of Metallurgical Engineering
University of Utah
135 S. 1460 E. Rm. 412
Salt Lake City, Utah 84112

- Cone Beam X-Ray Microtomography
- Applications
  - Spatial Variation in Composition
  - Microstructure Geometry
  - Particle Shape
  - Metrology
  - QC Inspection
  - Pore Network Structure of Packed Particle Beds
