- Ch.2 Sections 2.1-2.7
- Ch.3 Sections 3.1-3.7
- Ch.4 Sections 4.1-4.4
- Ch.5 Sections 5.1 and 5.3
- Ch.6 All sections
- Ch.7 Sections 7.1-7.5
- Ch.8 Sections 8.1-8.6

Tests and Exams:

1. Keep four decimal places for all your answers. Caution: You may lose points for tests and/or the final exam if you fail to do so.
2. Completely mark out any work which you do not want to show to the instructor. If you provide two or more solutions to the same problem the worst one will be picked for grading.
3. You must show your complete work to receive full/partial credit for all the problems except True/False problems and Multiple Choice problems.
4. To receive credit for True/False problems and Multiple Choice problems, correct answers must be circled. If you fail to circle the correct answer or circle more than one answer, you will get no credit for that question. Your work for True/False problems and Multiple Choice problems will be ignored.
5. You are allowed to use a scientific calculator during the exam.
6. Do not use red pen. The instructor will use this color for grading.

Grading:

1. Your grades will be based on three non-cumulative tests (60%) and the cumulative final exam (40%).
2. The lowest test core will be dropped before averaging. The final exam scores will not be dropped.
3. No makeup tests will be given.
