COURSE: STA 2023 Statistics for Business and Economics

INSTRUCTOR: Mr. McGuckian [Pronounced (Mick-Guck-in)]

PHONE: 954-201-2283     MY EMAIL: mcguckd@fiu.edu

OFFICE HOURS: 12:00 – 12:30, M - R in the math lab or by appointment.

TEXT: Elementary Statistics, eleventh Ed. Author: Mario F. Triola (Optional).

OBJECTIVE: This course is designed to provide undergraduate students with an introduction to some of the methods of statistical estimation and inference.

Statistics is widely used in business, government, and academia to make decisions based on quantitative reasoning. It gives the practitioner quantitative methods to estimate the value of, and to make inference about, important attributes of the population being considered. This course will lay the foundation for more in-depth study of statistical methods, or simply provide the student with a basic understanding of how statistics is used to aid the decision making process. Prerequisite: MAT 1033

CONTENT: This course in statistical methods includes such topics as collecting, grouping, and presenting data; measures of central tendency, position, and variation; theoretical distributions; probability; test of hypotheses; estimation of parameters; and regression and correlation. Use of statistical computer software and/or a scientific calculator (capable of performing 2-variable statistics) will be required.

EXAMS: There will be three exams and a cumulative final exam (all equally weighted at 100 points). A missed exam will result in a zero for that exam. There are NO makeup exams, and everyone must take the final. If your final exam grade is higher than the lowest of your first three exam grades, I will double your final exam grade to replace the lowest test grade. If you have missed one exam the final will be doubled to replace that missing grade. Therefore, if you have more than one emergency during the term that causes you to miss more than one exam you are encouraged to drop the course.

GRADING: The average of your four exams will make up your overall grade. The scale will be based on the following percentages: A = 100 - 90, B = 89 - 80, C = 79 - 70, D = 69 - 60, & F = 59 - 0. Please note that I do not issue grades of incomplete, and I do not withdraw students. It is your responsibility to withdraw yourself if you are not doing well in the course or you must stay in the class and take whatever grade you earn.
MATERIALS: Students will need a photo ID on test days. Students are encouraged to have the TI-83 (or TI-84) graphing calculators. Students will need scantrons for the multiple choice portion of the exams. Also, it is your responsibility to keep any returned examination papers in the event that you believe a grade was misreported.

I would like to apologize in advance for the sections that follow. Ninety percent of college students do not need to be told the information contained below, but for the handful that are under the delusion that they deserve special treatment, I must include it.

DISHONESTY: Any form of cheating or academic dishonesty is strictly forbidden in this class. If I find out that an exam turned into me is not the work of the sole person that has his/her name at the top of the page, I will issue a zero grade for the course, and the student may be subject to further disciplinary action.

COMMON ISSUES: Statistics can be a challenge which means you will need to work at it. Your grades are based on your exams and nothing else. Everyone should have and will have the same opportunities in the course. This means you cannot ask me for individual extra credit assignments, and I cannot change your grade or give you extra points. Finally, telling me how important it is that you pass this class doesn’t change any of the above principles. Everyone who takes this class feels like it is imperative that they pass. Your grade is not based on your individual circumstances, only your performance. If I were to grant you special treatment I would be treating you differently. While you probably wouldn’t mind me treating you differently when it helps you, others would feel they were not given the same opportunities. This means I would be treating them unfairly. Hopefully, you can see why that would be wrong.

SIGNATURE: By signing this document you are affirming that you will never ask me for special consideration regarding exams, assignments, make-ups or your final grade. That final grade will be based on the scale above (note: a 69.4% is not a 70% which means it is not passing—close doesn’t count here). By signing this you are stating that you clearly understand that there are no make-ups unless you have documentation verifying an unforeseen unpreventable emergency on or just before the day of the exam. Finally, you are also stating that you are aware that this syllabus and our accompanying tentative schedule is subject to change as needed to accommodate unforeseen issues that arise during the term. These changes will be announced in class, so it is important that you attend.
